

SQL Queries and Answers

Default (GPT-3.5)

```
select  
distinct(department_name) FROM sql_for_business_analytics.employees_1;
```

We need employee id of employee and status year but named as Year with maximum years of service and show only 10 records.

```
SELECT employee_id, status_year AS maximum_years_of_service FROM  
sql_for_business_analytics.employees_1 LIMIT 10;
```

Select details of employees having service length less than 20 years.

```
SELECT * FROM sql_for_business_analytics.employees_1 where length_of_service < 20;  
Find the employee age with less age but more years of service.
```

```
SELECT  
    min(age) as Less_Age,  
    max(length_of_service) as More_Of_Service_Year  
FROM sql_for_business_analytics.employees_1
```
